Dear Sir

ENVIRONMENTAL AUTHORISATION IN TERMS OF SECTION 24G OF THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 107 OF 1998: PROJECT REFERENCE S24G/03/16-17/0365: UNLAWFUL CONSTRUCTION OF A FACILITY FOR THE RECYCLING OF WASTE VEGETABLE OIL ON PORTION 2, 3, 4 AND 5 OF ERF 1641, ROODEKOP IR, EKURHULENI METROPOLITAN MUNICIPALITY

Your application for authorisation dated 27 June 2016 in terms of Section 24G of the National Environmental Management Act 107 of 1998 ("NEMA") as amended, read with Government Notice R921 of 29 November 2013, promulgated in terms of the National Environmental Management: Waste Act 59 of 2008 ("NEM:WA") refers.

ENVIRONMENTAL AUTHORISATION

1. DESCRIPTION OF THE ACTIVITY

The activity conducted on site involves the construction of a facility for the recycling of waste vegetable oil at Eco Energy Trading CC, Portion 2, 3, 4, and 5 of Erf 1641 Roodekop IR (Corner of Rail and Cannon Crescent), Ekurhuleni Metropolitan Municipality.

The activity entails -

- (1) The construction of a waste vegetable oil facility with the capacity to process approximately 2400 tonnes of waste vegetable oil per month (approximately 80 tonnes/day).
- (2) The installation of forty nine (49) above ground storage/reaction tanks as follows:

	Number and Size of Tank (m³)	Total Capacity (m³)	Tank Product Description
1	(a) 4 x 125 (b) 2 x 220	345	Waste Vegetable oil storage tanks
2	(a) 2 x 0464 (b) 4 x 60 (c) 4 x 50 (d) 1 x 30	470.928	Reaction tanks
3	(a) 3 x 14 (b) 2 x 14	70	Sulphuric Acid tanks
4	(a) 2 x 100	200	Waste water tanks
5	(a) 12 x 23 (b) 2 x 100 (c) 4 x 100 (d) 1 x 30 (e) 4 x 50	1106	Final Product tanks
6	(a) 1 x 14	14	Diesel Storage tank
7	(a) 1 x 33	33	Coal Storage

- (3) A boiler house with a generating capacity of 3.5 megawatts.
- (4) An effluent treatment plant with a treatment capacity of 33m³ per day.
- (5) Office buildings.

This authorisation is solely applicable to the abovementioned activity commenced with on the premises indicated. It does not include any proposed activities, processes or infrastructure that would require additional authorisation from the Gauteng Department of Agriculture and Rural Development.

The activity is identified in terms of Government Notice R921 of 29 November 2013 as follows:

Listed activity in terms of Government Notice R921 of NEM:WA	Description of the Activity
1. Category A: Item 3	The recycling of general waste at a facility that has an operational area in excess of 500m ² , excluding of recycling that takes place as an integral part of an internal manufacturing process within the same premises.

2. Category A: Item 5	The recovery of waste including the refining, utilization or co-processing of waste in excess of 10 tons but less than 100 tons of the general waste per day or in excess of 500kg but less than 1 ton of hazardous waste per day, excluding recovery that takes place as an integral part of an internal manufacturing process within the same premises.
3. Category A: Item 12	The construction of a facility for a waste management activity listed in category A of this schedule (not in isolation to associated waste management activity).

Hereafter referred to as **“the activity”**.

2. LOCATION

The activity took place on Portion 2, 3, 4 and 5 of Erf 1641 Roodekop IR (Corner of Rail and Cannon Crescent), within the jurisdiction of the Ekurhuleni Metropolitan Municipality.

The facility is bounded by the following co-ordinates:

	Latitude	Latitude
Point A	26°18'15.49" E	28°11' 41.71" S
Point B	26°18'16.49" E	28°11' 43.15" S
Point C	26°18' 9.98" E	28 11' 40.24" S
Point D	26°18'18.90" E	28°11' 38.75" S

Hereafter referred to as **“the location/the site”**.

5. SITE INSPECTION

A site inspection was conducted by officials of this Department in 15 July 2016.

6. DECISION

In terms of Section 24G (2)(b) of the NEMA, you are hereby granted authorisation subject to conditions contained in this Environmental Authorisation, for the continuation of the activity in respect of the abovementioned application. Authorisation is only granted in terms of Section 24G of NEMA, read with Government Notice R921 of 29 November 2013 promulgated in terms of the NEM:WA.

This environmental authorisation is granted solely for the purposes of undertaking the activity referred to in section one above. It does not include any proposed activities, processes or infrastructure that would require additional authorisation from the Gauteng Department of Agriculture and Rural Development, and does not exempt the Holder of the Authorisation hereof, from complying with any other any other statutory requirements applicable to undertaking the activity. This environmental authorisation shall only take effect from the date of signature.

7. CONDITIONS

7.1. Approvals and Submissions

7.1.1. The Environmental Management Plan ("EMP") submitted as part of the Environmental Impact Report dated 15 December 2016, compiled by Zantow Environmental Consulting Service is approved and hereby forms an extension of this Environmental Authorisation. All recommendations contained therein must be adhered to.

7.1.2. The Waste Management Plan ("WMP") submitted as part of the Environmental Impact Assessment dated 15 December 2016, compiled by Zantow Environmental Consulting Service must be amended to include -

- (a) the list of waste streams catered for/generated from the site;
- (b) classification of the wastes;
- (c) possible waste generation areas within the site;

- (d) management methods, including temporary storage duration prior to final disposal, as the case may be, and disposal frequency; and
- (e) The responsible person for each task identified.

The amended WMP must be submitted to the Department within three (3) months of signature of this authorization for approval. Once approved, the amended WMP will form an extension of this authorization and all recommendations contained therein must be adhered to.

7.1.3. The Emergency Preparedness Plan ("EPP") Submitted as part of the Environmental Impact Assessment dated 15 December 2016 is noted and considered an extension of this authorization. All recommendations contained therein, as well as all updated versions of the EPP thereafter, must be implemented and adhered to.

7.1.4. The Storm Water Management Plan ("SWMP") developed for the site must be submitted to the relevant municipal office for approval. Once approved, a copy of the SWMP must be submitted to this Department within three (3) months of the date of approval by the relevant municipality. The approved plan will also form an extension of this authorisation and all recommendations therein must be adhered to. To this effect, the Holder of the Authorisation shall remain responsible for ensuring implementation and compliance with the approved SWMP.

7.2. Appointment of Environmental Control Officer

7.2.1. An independent Environmental Control Officer ("ECO") must be appointed to monitor compliance to the issued Environmental Authorisation. The name and contact details of the ECO must be submitted to the Department within thirty (30) days of receipt of this authorisation. The duties of the appointed ECO must include, but not be limited to the following:

7.2.1.1. Monitor of compliance to the conditions of the issued Environmental Authorisation.

7.2.1.2. Undertake training sessions on the contents, requirements and implementation of the EMP and the WMP with all contractors and staff working on-site, prior to such persons being allowed to continue with the activities on site. Proof of all trainings conducted must be retained on site and must be presented upon request by the Environmental Management Inspectors ("EMIs") or any other official from relevant authorities.

7.2.1.3. Compilation and submission of monitoring and audit reports, when required.

7.3. Management of the Activity

7.3.1. No surface or ground water may be polluted as a result of any activity on the site. "Pollution" in relation to a water resource is defined in the National Water Act, 1998 (Act 36 of 1998) as the direct or indirect alteration of the physical, chemical or biological properties of a water resource so as to make it-

- (a) less fit for any beneficial purpose for which it may reasonably be expected to be used;
- (b) harmful or potentially harmful-

- (aa) to the welfare, health or safety of human beings;
- (bb) to any aquatic or non-aquatic organisms;
- (cc) to the resource quality; or
- (dd) to property.

- 7.3.2.** All effluent from the site must meet both the relevant municipal authority and the Department of Water and Sanitation's ("DWS") requirement before being discharged into a municipal sewer or reused in such a way that may not result in the contamination of any surface/ground water.
- 7.3.3.** The Holder of the Authorisation must ensure that all storm water drains and channels are maintained at all times to prevent wear and tear. It must also be ensured that the storm water channels are unblocked in order to facilitate proper water flow from the site.
- 7.3.4.** If any soil contamination is noted during the operation of the facility, remediation of the contaminated area must be done in accordance to the applicable legislation, standards and procedures. The opportunity for the onsite remediation and reuse of contaminated soil must be investigated prior to resorting to removal to a suitable waste disposal facility. Rehabilitation must be done to the satisfaction of this Department and the Department of Water and Sanitation ("DWS").
- 7.3.5.** A designated paved area must be used for the washing of equipment (such as skips) and vehicles within the facility. The effluent from the wash area must be directed into the effluent treatment facility to prevent pollutants getting into the storm water drainage system.
- 7.3.6.** An integrated waste management approach, based firstly on waste minimisation, must be implemented and this must incorporate reduction, recycling, re-use and recovery of waste where appropriate. All wastes must be collected and disposed off at an appropriately licensed waste disposal site in terms of Chapter 2 of the National Environmental Management: Waste Act, 2008 (Act No. 59 of 2008).
- 7.3.7.** All hazardous wastes generated on site must be kept in a designated hazardous substances storage/disposal areas. The area must be clearly marked and guidance must be provided on the safety requirements of the substances stored.
- 7.3.8.** The Holder of the Authorisation must ensure that the areas on site dedicated to the storage of waste vegetable oil prior to being processed are kept clean and tidy at all times.
- 7.3.9.** The offloading and uploading of waste vegetable oil must be done at dedicated areas with impermeable surfaces. Care must be taken during these times to prevent spillages and leakages.
- 7.3.10.** The Holder of the Authorisation must ensure that no burning or burying of waste takes place on site.
- 7.3.11.** Waste with offensive odour must be stored in a manner that prevents easy diffusion of odour to the environment. Odour suppressants must be used to combat odour.

- 7.3.12.** Dust suppression measures must be employed around the facility to reduce the effect of air pollution that could result from dust.
- 7.3.13.** All hazardous wastes must be disposed of at a licensed hazardous waste disposal site.
- 7.3.14.** The Holder of Authorisation must ensure that all non-recyclables wastes on site are collected and disposed of at an appropriately licensed landfill site.
- 7.3.15.** A record of all wastes leaving the site must be maintained and these records must be made available to this Department on request.
- 7.3.16.** All fuel, lubricants and chemicals must be stored on an impermeable surface and within a bunded area. The storage area must be kept free of debris and any other object not originally designed to be included in the bund. The drainage valve built into the bund must be kept closed at all times and only opened under controlled conditions.
- 7.3.17.** All vehicles and equipment used on the site must be maintained to ensure that oil/chemical spillages and leakages are kept to a minimum. Drip trays must be used while refuelling and spill kits must be placed in easily accessible areas.
- 7.3.18.** The following measures must also be implemented during the operational phase of the chemicals/hazardous substances tanks:
- (a) Management and all personnel on site must be adequately trained to handle emergencies. All personnel utilizing the tanks must also be trained to prevent and manage any potential spills and leakages from the tanks in order to prevent surface water and soil contamination.
 - (b) Daily stock reconciliation must be enforced for early detection of leaks and updated records must be kept on site. This must consist of recordings detailing the pump readings, tank volumes, deliveries, off takes and variances and all discrepancies must be investigated.
 - (c) Adequate emergency shut-off devices must be installed and used during any suspected emergency.
 - (d) The relevant oil industry's standards/ chemical substances standards must be implemented at all times.
 - (e) Firefighting equipment must be placed within close proximity of the installed facility.
- 7.3.19.** The Holder of the Authorisation must ensure that noise levels are kept to a minimum and must comply with the applicable by-laws as required by the relevant Municipality.
- 7.3.20.** The Holder of the Authorisation must ensure that adequate signage and all emergency contact numbers are visually displayed at relevant points on site.
- 7.3.21.** A 'complaint' and 'incident' register must be instituted within three (3) months of the signature of this environmental authorisation. All complains and incidents resulting from the operation of the facility and actions taken to remediate the incidents must be

recorded in this register. The register must be made available to officials of this Department on request.

7.4. Monitoring, Audits and Reporting Protocol

7.4.1. The Holder of the Authorisation must ensure that bi-annual monitoring audits are conducted by an appropriately qualified specialist and a report compiled based on the findings of the audits. The audits must commence six (6) months after the finalisation of the rehabilitation of the site (as per paragraph 7.1.1 above) for a period three (3) years. The results of the audit must be kept on site and made available to the EMIs and any other relevant official upon request. The audit report must include discussions on, but not be limited to, the following:

- (i) Compliance with the conditions of this authorisation.
- (ii) Discussion on the Storm Water Management of the site, and adequacy thereof.
- (iii) Discussions on the effectiveness and adequacy of all environmental management measures introduced and implemented to mitigate against the possible impacts from the operation of the vegetable oil recycling plant.
- (iv) Details of any emergency incident regarding the operation of the facility that occurred during the period under review. Emergency procedures and fire drills undertaken during this period must also be discussed.
- (v) Records confirming appropriate disposal of all wastes generated from the facility.
- (vi) Recommendations for the review/update of the EMP.
- (vii) Details of any complaints received during the reporting period and how these were managed.

7.5. Compliance with Legislation and other Licenses/Permits

7.5.1. The Holder of the Authorisation must obtain an authorisation from this Department for any further proposed activity (ies) listed in terms of Section 24 and 24D of NEMA, prior to commencement thereof.

7.5.2. The Holder of the Authorisation must ensure that all installations relating to the fuel/oil storage facility comply with the South African National Standards and other relevant oil industry's standards.

7.5.3. All operations must be conducted in line with the Noise Regulations promulgated in terms of the Environment Conservation Act 73 of 1989, as amended.

7.5.4. The Holder of the Authorisation must comply with the requirements of the National Norms and Standards for the storage of waste as outlined in Regulation 926 of 29 November 2013 promulgated in terms of the NEM:WA.

7.5.5. The Holder of the Authorisation must ensure that employees are provided with adequate PPE to mitigate exposure to hazards within the facility. He must also ensure

compliance with the requirements of the Occupational Health and Safety Act, 1993 (Act No.85 of 1993) for the employees.

7.5.6. The Holder of the Authorisation is responsible for compliance with the provisions for duty of care and remediation of environmental damage as contained in Section 28 of the National Environmental Management Act, 1998 (Act 107 of 1998).

7.5.7. This authorisation does not exempt the holder thereof from complying with any other relevant legislation and requirements of other governmental Departments (i.e. National, Provincial and Local). The Holder of the Authorisation must ensure that all necessary permits and/or authorisations are obtained from the relevant authorities.

7.6. Decommissioning, Closure and Rehabilitation

7.6.1. Should the Holder of the Authorisation plan to decommission this activity for any reason, necessary steps must be taken to prevent any environmental damage that may be caused during the decommissioning phase. Please note that should this be considered a listed activity in future, the necessary authorisation must be obtained prior to decommissioning and/or site closure.

7.6.2. The Holder of the Authorisation shall remain responsible for the site and/or any of its impacts on the environment, after operations on the site have ceased.

7.7. General Conditions

7.7.1. The activity which is authorized in terms of Section 24G of NEMA already exists on the property indicated above.

7.7.2. The Holder of the Authorisation must take reasonable steps to minimize or prevent any activity in violation of this authorisation which has a reasonable likelihood of adversely affecting human health or the environment.

7.7.3. The Holder of the Authorisation shall be responsible for ensuring compliance with the conditions contained in this letter by any person acting on his behalf, including but not limited to, an agent, servant, or employee or any person rendering a service to the Holder of the Authorisation in respect of the activity, including but not limited to, contractors and consultants.

7.7.4. Any changes to, or deviations from, the project description set out in this authorisation must be approved, in writing, by the Department before such changes or deviations may be effected. In assessing whether to grant such approval or not, the Department may request such information as it deems necessary to evaluate the significance and impacts of such changes or deviations and it may be necessary for the Holder of the Authorisation to apply for further authorisation in terms of the regulations.

7.7.5. The Holder of the Authorisation must, within twenty four (24) hours, notify the Department of the occurrence or detection of any incident on the site, or incidental to

the operation of the site, which has the potential to cause, or has caused pollution of the environment, health risks, nuisance conditions or water pollution.

7.7.6. The Holder of the Authorisation must –

- (i) Notify the Department in writing, at least fourteen (14) days prior to the change of the Holder of the Authorisation's trading name, registered name or registered physical/postal address and/or telephonic details.
- (ii) Notify the Department in writing, at least fourteen (14) days prior to the change in particulars of the Holder of the Authorisation's ultimate holding company (including details of an ultimate holding where the Holder of the Authorisation has become a subsidiary).
- (iii) Notify the Department in writing, at least fourteen (14) days prior to the change of project developer/manager for the activity described in this Environmental Authorisation.
- (iv) Submit an amendment application in terms of Part 1 of Chapter 5 of the Environmental Impact Assessment Regulations of 08 December 2014 for a change of ownership or transfer/alienation of rights and obligations for the activities described in terms of this Environmental Authorisation.

7.7.7. Should the new information not be known to the Holder of the Authorisation prior to the change, the Department must be informed within fourteen (14) days of the new details being known to the Holder of the Authorisation.

7.7.8. The Holder of the Authorisation must furnish a copy of this authorisation to the new owner, developer or person to whom the rights accrue and inform the new owner, developer or person to whom the rights accrue that the conditions contained herein are binding on them.

7.7.9. The Applicant must within fourteen (14) days of receiving this Environmental Authorisation ensure that –

- (i) All registered interested and affected parties are provided with access to the Environmental Authorisation; and
- (ii) All registered interested and affected parties are notified of the fact that an appeal may be lodged against the decision in terms of the National Appeals Regulations, 2014 as indicated in paragraph 9 below.

7.7.10. Departmental officials shall be given access to the property referred to in section 2 above for the purpose of assessing and/or monitoring compliance with the conditions contained in this document at all reasonable times.

7.7.11. A copy of this authorisation must be kept at the property where the activity is being undertaken. The authorisation must be produced to any official of the Department who requests to see it and must be made available for inspection by employees or agents of the Holder of the Authorisation who undertakes work at the property.

7.7.12. This authorisation shall not be construed as the Holder of the Authorisation from compliance with the provisions of any other National and Provincial Legislation, and any relevant Ordinance, Regulation, by-laws and National Norms and Standards

8. KEY FACTORS INFORMING THE DECISION

8.1. In reaching its decision in respect of the application, the Gauteng Department of Agriculture and Rural Development ("the Department") has taken, *inter alia*, the following into consideration:

- 8.1.1. The Section 24G application dated 26 June 2016;
- 8.1.2. Information obtained from the Department's Geographic Information System Data Base i.e. the Gauteng Conservation Plan (Version 3);
- 8.1.3. The findings of the site inspection conducted by officials of this Department on 15 July 2016;
- 8.1.4. The Environmental Impact Assessment Report compiled by Zantow Environmental Consulting Services dated 15 December 2016; and
- 8.1.5. The payment and proof thereof of the imposed administrative fine of R323, 750.00 (Three Hundred and Twenty Three Thousand, Seven Hundred and Fifty Rand).

8.2. In reviewing this information, the Department made the following findings:

8.2.1. Biophysical

- (i) The Department's Information System indicates that the site has no sensitive environmental features or identified conservation importance.

8.2.2. Public Participation

- (i) The unlawful activity was advertised in a local newspaper - Germiston City News, on 15 July 2016.
- (ii) A site notice was placed in the development area.
- (iii) Interested and Affected Parties were given thirty (30) days to lodge any objections and/or comments.
- (iv) One concern was raised by an Interested and Affected Party and the Department is of the view that this concern was adequately addressed.
- (v) Proof of publication of the advertisement, on-site notice as well as letters sent to adjacent landowners were submitted to Section 24G Unit of this Department as required.

8.2.3. Other considerations/reports

- (i) The Environmental Impact Report submitted to the Department which properly provided mitigation measures for the impacts that could result from the activity.
- (ii) Sufficient information was submitted to enable the Department to make an informed decision regarding this application.

In view of the above, this Department is satisfied that, subject to compliance with the conditions stipulated in this decision, the activity does not conflict with the general objectives of integrated environmental management laid down in Chapter 5 of the National Environmental Management Act, 107 of 1998 and that any potentially detrimental environmental impacts resulting from the

activity can be mitigated to acceptable levels. The section 24G Environmental Authorisation is accordingly granted.

9. APPEALS

9.1 Any affected person who wishes to appeal against this decision must lodge such appeal in accordance with the procedure stipulated in The National Appeals Regulations of 08 December 2014 (as amended). An Appellant must submit the appeal to the Department's Appeal Administrator, and a copy of the appeal to the Holder of the Authorisation, any Registered Interested and Affected Party, and any organ of state interested in the matter, within 20 days from:

9.1.1 The date that the notification of the decision for an application for an environmental authorisation or a waste management license was sent to the registered interested and affected parties by the Applicant; or

9.1.2 The date that the notification of the decision was sent to the Applicant by the competent authority, issuing authority or licensing authority, in the case of decisions other than those referred to in paragraph (a).

9.2 Further, an appeal submission must be-

- (a) done in writing in the form obtainable from the Department's Appeal Administrator at telephone number 011 240 3204 or email address tsholofelo.mere@gauteng.gov.za or the Department's website: www.gdard.gpg.gov.za; and
- (b) accompanied by-
 - (i) a statement setting out the grounds of appeal;
 - (ii) supporting documentation which is referred to in the appeal submission; and
 - (iii) a statement, including supporting documentation, by the Appellant to confirm compliance with section 4(1) of the National Appeals Regulation of 08 December 2014 (as amended).

9.3 Appeals can be submitted through the following means:

By hand: Umnotho House, 56 Eloff Street, Marshalltown, Johannesburg

By post: MEC: Gauteng Agriculture and Rural Development
P. O. Box 8769
Johannesburg
2000.

All interested and affected parties that wish to appeal must serve on the Holder of the Application a copy of their notice of intention to appeal as well as a notice indicating where and for what period the appeal submission will be available for inspection by the Holder of the Authorisation.

If the Holder of the Authorisation should decide to appeal, the Holder of the Application must serve a copy of the notice of intention to appeal on all registered interested and affected parties as well as a notice indicating where and for what period the appeal submission will be available for inspection.

10. CONSEQUENCES OF NON-COMPLIANCE

The Holder of the Authorisation must comply with the conditions set out in this authorisation. Failure to comply with any of the above conditions may result in, *inter alia*, the institution of criminal proceedings and/or issuing a compliance notice. Furthermore, the Department may also choose to withdraw the authorisation, issue a directive to address any environmental damage as well as institute civil proceedings where necessary.

Please note that designated Environmental Management Inspectors from this Department are given wide powers in terms of the NEMA to investigate whether or not you are complying with the conditions of this authorisation, and to enforce any contravention, including the power to seize items used in the commission of the offence as well as the power of arrest. Please note that failure to comply with a condition of this environmental authorisation and an approved document is an offence in Section 49A read with Section 49B of NEMA.

11. AMENDMENT TO ENVIRONMENTAL AUTHORISATION

The Environmental Impact Assessment Regulations of 08 December 2014 (as amended) issued in terms of NEMA provide for the amendment of an environmental authorisation by the Holder of the Authorisation and on the initiative of the Department. Please take note of the provisions set out in Chapter 5 of these regulations should you wish to apply for an amendment to this authorisation.

Should the Holder of the Authorisation wish to amend the environmental authorisation, the amendment must be done in writing on the form obtainable from the S24G Unit Manager via email address maryjane.ramahlodi@gauteng.gov.za or the Department's website: www.gdard.gpg.gov.za.

12. APPLICABILITY OF THE NATIONAL ENVIRONMENTAL MANAGEMENT: WASTE ACT, (ACT NO 59 OF 2008)

The provisions set out in section 81 of the National Environmental Management: Waste Act (Act No 59 of 2008) must be taken into consideration and appropriate action must be taken as indicated therein.

Yours faithfully

Mr BN Nkontwana
